Printed on acid-free paper

In memory of my late grandparents Nathan and Lea Axelrod,
pioneers of the Israeli cinema. Your memory is my inspiration.

Table of Contents

About the Author xvii

About the Technical Reviewer xix

Acknowledgments xxi

Introduction xxiii

Part I: The "Why" and the "What" 1

Chapter 1: The Value of Test Automation 3

Why Do We Need Test Automation? 3

From Waterfall to Agile Software Development 4

The Cost of Software Complexity 6

Maintaining a Constant Cost 7

Refactoring 9

Continuous Improvement 10

Chapter 2: From Manual to Automated Testing 13

First Attempt: Record and Playback 13

Getting the Most Out of Test Automation 16

Differences Between Manual and Automated Tests 18

Exploratory Testing 19

Considerations for Automated Testing 21

Chapter 3: People and Tools 31

Choosing the Right Tools 31

Who Should Write the Tests? 32

Promoting Manual Testers or Inexperienced Programmers to Automation Developers 32

Splitting the Work Between Manual Testers and Automation Programmers 35

Using a Dedicated Automation Team 37

Having Dedicated Automation Developer(s) Inside Each Team 38
Give the Developers the Ownership for the Automation 39
The Variety of Tools 40
Classification of Tools 40
IDEs and Programming Language 41
(Unit) Testing Frameworks 45
BDD-Style Frameworks 46
SUT Interaction Technologies 48
Test Management Suites 60
Build Tools and CI/CD Pipelines 60
Other Considerations for Choosing Tools 61

Chapter 4: Reaching Full Coverage 63
How Do You Measure Coverage? 64
Percentage of Manual Test Cases Covered by Automation 65
Percentage of Covered Features 65
Percentage of Code Coverage 66
Gaining Value Before Reaching Full Coverage 71
What Do We Do When We Have Full Coverage? 71
How Do We Get to 100% Coverage? 72
Reversing the Wheel 74
My Road Map to Successful Automation Project 77
When to Start Working on Progression 78
Prioritizing the Work to Fill the Regression Gap 79

Chapter 5: Business Processes 83
Running the Tests on a Regular Basis 83
The Simplest Approach 84
Nightly Runs 85
Handling Bugs That Are Found by the Automation 86
Keep the Failing Tests 86
Exclude the Failing Tests 88

Creating Work-Arounds in the Test 89
Treating All Automation Failures as Critical Bugs 91
Continuous Integration 92
Acceptance Test Driven Development (ATDD) 93
Continuous Delivery and Continuous Deployment 94
Canary Releases 95
Summary 97

Chapter 6: Test Automation and Architecture 99
Test Architecture Considerations 99
Understanding the SUT Architecture 100
Back to Basics: What’s a Computer System? 100
What’s an Automated Test? 101
Real-World Computer Systems 102
Alternatives and Considerations in a Layered Architecture 106
The Relationships Between the Scope and the Test 107
Overview of the Layers 109
The Alternative Test Scopes 111
Real-World Architecture 130
Intended Architecture vs. the Actual One 130
Common Variations 130
Combining Tests 132
Summary of the Considerations 135
Beyond the Layered Architecture 139
Summary: Making Your Own Choice 143

Chapter 7: Isolation and Test Environments 145
State 145
Isolation Problems and Solutions 147
Problem 1 – Manual Tests and Automated Test Running in Different Times 147
Problem 2 – Manual Tests and Automated Tests Running Simultaneously 148
Problem 3 – Order Matters 149
Problem 4 – Automated Tests Running Simultaneously 150

Isolation Techniques.......... 150
    Use Separate Accounts.......... 150
    Separate Between Manual Testing and Test Automation Databases.......... 151
    Having Separate Environments for Each Team Member.......... 151
    Resetting the Environment Before Each Test Cycle.......... 153
    Create Unique Data for Each Test.......... 157
    Each Test Cleans Everything It Creates.......... 162
    Read-Only Shared Data.......... 164
Summary.......... 165

Chapter 8: The Big Picture.......... 167
The Relationships Between Software Architecture and Business Structure.......... 167
    Conway's Law.......... 167
    Horizontal Teams vs. Vertical Teams.......... 168
The Relationships Between Software Architecture and Organizational Structure with Test Automation.......... 170
    Dedicated Automation Team.......... 170
    Automation Developers Inside Horizontal Teams.......... 170
    Automation Developers Inside Vertical Teams.......... 171
    Flexible Organizational Structure.......... 172
    Having an Automation Expert.......... 173
Summary.......... 173

Part II: The "How".......... 175

Chapter 9: Preparing for the Tutorial.......... 177
Prerequisites and Presumptions.......... 177
Applicability of the Process for Existing Test Automation Systems.......... 178
Overview of the Process.......... 179
    Bottom Up vs. Top Down.......... 179
    The Process.......... 180
Getting to Know the SUT.......... 181
    Overview on MVCForum.......... 182

Preparing the Environment for the Tutorial 185
    Install Visual Studio Community Edition 186
    Download and Install Chrome 186
    Download and Install SQL Server Express 186
    Download and Build the Application 187
    Install Resharper (Optional) 192
Using Git Through Visual Studio 193
    Switching Between Branches 194
Summary 198

Chapter 10: Designing the First Test Case 199
Choosing the First Test to Automate 199
    Choosing the First Test Case for MVCForum 204
The Scientific Method for Designing a Test Case 205
    Designing the Steps of the Test 205
    Thinking in Terms of Objects and Entities 208
Summary 217

Chapter 11: Start Coding the First Test 219
Creating the Project 219
    Renaming the Class, Filename, and Test Method 222
Write the Pseudo-code 224
    Remarks About the Pseudo-code 225
Getting the Code to Compile 228
    Declaring the LoggedInUser Class 230
    Declaring the MVCForum Property 230
    Declaring the RegisterNewUserAndLogin Method 232
    Declaring the Rest of the Classes and Methods 233
Model Code Review 237
Summary 238

Chapter 12: Completing the First Test 239

Running the Test to Find What to Implement First 239

Adding Selenium to the Project.. 241

Running IISExpress.. 243

Implementing the MVCForumClient Constructor.. 244

Implementing RegisterNewUserAndLogin 246

Asking the Developer to Add a Unique Automation Identifier 251

Implementing the Property Setters 254

Removing Duplication from the Property Setters 257

Hitting the Isolation Problem.. 260

Implementing CreateDiscussion and Analyzing the Failure 264

Completing the Test 269

Summary... 270

Chapter 13: Investigating Failures 271

Integrating with Latest Version of MVCForum.. 271

Improving the Error Reporting... 273

Avoid Debugging.. 277

Investigating the Root Cause... 278

Resolving the Problem... 279

More Issues… 280

Logging and Other Evidence Collection 287

Screen Capture... 287

Logging... 288

Nested Logging... 288

Visual Logging 290

Additional Logging and Diagnostics Options 290

Adding Nested Visual Logger to MVCForum Tests.. 293

Investigating Challenging Failures.. 295

Failures That Happen Only On One Machine 296

Investigating Influencing Tests.. 300

Investigating Flickering Tests.. 301

Summary... 308
